

# Finlay Community School

## Science 2025/2026

### Our Whole School Curriculum Intent

At Finlay, we aim to teach a broad and balanced curriculum that enables children to enjoy, achieve and succeed in line with the National Curriculum. This correlates with our whole school vision of Aspire, Belong and Achieve. We provide opportunities to develop the children's cultural capital and ensure they are life-long learners, who are ready for the next step of the education and to thrive in Society. In addition to teaching the National Curriculum, we also aim for our children to leave school with a SMILE! Our SMILE values are: social awareness, mental health and wellbeing, independence, life skills and excellent aspirations. We provide opportunities to develop these values in all curriculum areas.

### Our Science Intent

At Finlay, we teach the National Curriculum. As outlined in the National Curriculum, "a high-quality science education provides the foundations for understanding the world through the specific disciplines of biology, chemistry and physics". Science has changed our lives and is vital to the world's future prosperity, and all pupils should be taught essential aspects of the knowledge, methods, processes and uses of science. Through building up a body of key foundational knowledge and concepts, pupils should be encouraged to recognise the power of rational explanation and develop a sense of excitement and curiosity about natural phenomena. They should be encouraged to understand how science can be used to explain what is occurring, predict how things will behave, and analyse causes. Science is a core subject and is taught weekly at Finlay, in its own subject discipline. Staff at Finlay use our planning matrix to ensure coverage of their science objectives, but also assess the pupil's learning using Insight: our whole-school assessment system for core subjects. Our intent for science is closely aligned to our school SMILE values and our school motto: *Aspire, Belong, Achieve* as pupils learn more about the reasons for the world being the way that it is, and are equipped with

# Whole School Curriculum Overview:

## Science Overview

### Reception

Autumn 1 and 2: Animals including humans (senses walks, looking at ourselves, baby animals)

Spring 1: Everyday materials

Summer 1: Living things and their habitats.

Summer 2: Understanding plants

### Year 1

Autumn 1 and 2: Types of materials and their properties (making a toy)

Spring 1: Seasonal changes

Spring 2: Wonder

Summer 1: Understanding plants, trees, structure of a plant/tree

Summer 2: Animals including humans - common animals: fish, amphibians etc and omnivores, carnivores and herbivores.

### Year 2

Autumn 1: Everyday materials: Identify and compare suitability of materials:

Autumn 2: Animals and their habitats.

Spring 1: Animals including humans - how offspring grow - children to adults.

Spring 2: Wonder

Summer 1: Observe how plants grow

Summer 2: Animals including humans - how humans stay alive, healthy lifestyle and exercise.

### Year 3

Autumn 1: Rocks and fossils

Autumn 2: Light and shadow

Spring 1: Forces and magnets

Spring 2: Wonder

Summer 1: Plants - features, how they grow, water transportation, seed dispersal.

Plants in hot places compared to the UK.

Summer 2:

Animals including humans

### Year 4

Autumn 1: The digestive system

Autumn 2: Electricity: circuits and how they work (Making a chariot)

Spring 1: Materials: changing state, reversible and irreversible changes solid, liquid, gas. The Water Cycle.

Spring 2: Wonder

Summer 1: Classification, living things, environmental change. Food chains

Summer 2: Sound and how it travels

### Year 5

Autumn 1: Science: states of matter and reversible and irreversible changes, dissolving and filtering.

Autumn 2: Space

Spring 1: Living things and their habitats, plants, life cycles of animals, reproduction in plants (green eyed tree frog)

Spring 2: Wonder - Oxford Building Bridges

Summer 1: Forces, Materials and magnets

Summer 2: Changes in humans as they age: adolescence and puberty.

### Year 6

Autumn 1: Animals including humans: exercise and the Circulatory system.

Autumn 2: Electricity

Spring 1: Living things and animals: classification of animals and plants

Spring 2: Wonder

Summer 1: Evolution and inheritance

Summer 2: Light

# Coverage Term by Term (EYFS – Year 6)

|                  | Autumn Term                                                                                        |                            | Spring Term                                                        |          | Summer Term                                                                                    |                                                                                                       |

|                                                                        |  |  |  |  |  |  | wires, bulbs, switches and buzzer.                                                                                                  |  |                                                                                                                                                                     |
| Understand how different components impact on others within a circuit. |  |  |  |  |  |  | Recognise that a switch opens and closes a circuit and associate this with whether or not a lamp lights in a simple series circuit. |  | Associate the brightness of a lamp or the volume of a buzzer with the number and voltage of cells used in the circuit.                                              |
|                                                                        |  |  |  |  |  |  | Identify whether or not a lamp will light in a simple series circuit, based on if the bulb is part of a complete loop.              |  | Compare and give reasons for variations in how components function, including the brightness of the bulbs, loudness of buzzers and the on/off position of switches. |
| Recognise and understand conductors and insulators.                    |  |  |  |  |  |  | Recognise some common conductors and insulators, and associate metals with being good conductors.                                   |  |                                                                                                                                                                     |

| Prior objectives<br>(Taken from Planning Matrix) | <p>Year 2:<br/>Observe and describe how seeds and bulbs grow into mature plants.<br/>Find out and describe how plants need water, light and a suitable temperature to stay and grow healthily and how changing these effect the plant.<br/>Know that plants are living and eventually die.</p> <p>Year 1:<br/>Identify and describe the basic structure (at least: flower, leaf, root, stem, trunk, seed, branch and petal) of a variety of common flowering plants, including deciduous and evergreen trees.</p>                         | Current year group objectives (Taken from Planning Matrix) | <p>Year 3:<br/>Identify, locate and describe the functions of different parts of flowering plants (roots, stem/trunk, leaves and flowers).<br/>Explore the requirements of plants for life and growth (air, light, water, nutrients from soil and room to grow) and how they vary from plant to plant.<br/>Explore the part that flowers play in the life cycle of flowering plants, including pollination, seed formation and seed dispersal.<br/>Investigate the way in which water is transported within plants</p> |
| Key vocabulary                                   | <p>Root: helps anchor the plant into the soil. Takes up water and nutrients.<br/>Stem: holds the plant upright and supports the leaves. Contains tubes that allow water to travel from the roots to the rest of the plant.<br/>Flower: the part of the plant where seeds are made.<br/>Leaves: catch sunlight and use this to make food.<br/>Veins: tubes in the leaf that carry water and food.<br/>Germinate: when a seed starts to grow and produce a root and shoot.<br/>Pollen: dust-like powder made in the stamen of a flower.</p> |                                                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

|                                                                                                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
|----------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                                                                    | <p>Pollination: moving the pollen from the stamen of one flower to the stigma of another.</p> <p>Ovary: the part of the flower that contains the ovules.</p> <p>Sepals: protect the rest of the flower as it grows. Stamen: the male part of the flower produces pollen.</p> <p>Carpel: female part of the flower - made of stigma, style and ovary.</p> <p>Stigma: part of the carpel that pollen grains attach to during pollination.</p> <p>Style: the middle part of the carpel, connecting the ovary to the stigma.</p> <p>Ovule: these are like eggs - they develop into seeds.</p> <p>Petal: part of the flower which attracts insects - often brightly coloured.</p>                                                                                                                                                                                                                                                                                    |
| <p><b>Lesson 1:</b><br/>Elicitation and recap</p>                                                  | <p>TBAT:<br/>Elicitation:</p> <p>Share a concept cartoon about plants and discuss as a class</p> <p>Post it notes as a class - what do you know about plants?<br/>Can you name any?<br/>What do plants need to grow?</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| <p><b>Lesson 2:</b><br/>Teach new knowledge</p> <p><b>Parts of a plant and their functions</b></p> | <p>TBAT: Identify, locate and describe the functions of different parts of a flowering plant (roots, stem, trunk, leaves and flowers)</p> <p><b>Quick challenge:</b><br/>Explain why tall trees don't fall over. What's keeping them up?<br/>Think about the different plants that we eat. For each one - do we eat the leaf, root, stem or flower?<br/>(N.B. fruits grow from the flower)</p> <p><b>Main activities</b><br/>Get into groups: Bring in examples of plants for the children to look at, such as geraniums in pots.<br/>Ask groups to identify the different parts of the plants that they can remember from Year 1. Get groups to discuss what job they think each part of the plant does. Write their ideas on sticky notes. Carefully lift one plant out of the pot to show the roots. Then discuss their ideas as a class. The children can label the parts of a plant on 'Plant parts' activity sheet (Activity resource book, page 31).</p> |

|                                                                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
|--------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                                          | <p>Class activity: Ask the children to think of a pose or an action that they can perform for each part of the plant. For example, they could stand up straight to mimic a stem; and leaves catch sunlight, so they could mime catching something. Then show them the 'Plant parts song' and ask them to do their actions as each part of the plant is mentioned. Check out <a href="http://www.schooltube.com/video/8b5cd92efbe9708a4a5a">www.schooltube.com/video/8b5cd92efbe9708a4a5a</a>.</p> <p>Get into groups: Take the children outside to examine a tree. How is it the same as the plants they were looking at in the classroom? How is it different? Can they identify the leaves, roots and stem? Can they see any flowers?</p> <p><b>Independent activity:</b></p> <p>Make a collage of a plant from different materials such as silver paper, crumpled-up crepe paper, string and sequins. Add labels for each part and a caption explaining the function</p> <p>Differentiation: word bank, cut and stick labels, gap fill for function</p> |
| <p><b>Lesson 3</b></p> <p>Teach new knowledge</p> <p>What is pollen?</p> | <p>TBAT: Explore the part that flowers play in the life cycle of flowering plants, including pollination, seed formation and seed dispersal.</p> <p><b>Recap</b></p> <p>Quick game in pairs matching the parts of a flower to a diagram with the functions - see who can do it in the quickest time?</p> <p><b>Quick challenges</b></p> <p>Discuss hay fever - how many children in your class have it?</p> <p>Do they know what causes it?</p> <p>Show some different flowers on the whiteboard. Can the children name them? Do some research to find the correct answer</p> <p><b>Main activities</b></p>                                                                                                                                                                                                                                                                                                                                                                                                                                                |

Get into groups: Take a close look at a lily or a tulip. Identify the different parts of the flower. Point out where the pollen is made. Gently remove the petals and sepals, placing them on a large sheet of paper. Then carefully remove the stamen and carpels. Stick all the parts down onto a big sheet of paper using a large strip of sticky tape and label each part. Count the number of sepals, petals, stamens and carpels in the flower. Be careful: pollen can stain clothes. Children can use the activity sheet, 'Flower power' to label the parts of a flower (Activity resource book, page 32). Photograph dissecting of flower for science books.

Get interactive: Children can label the parts of a flower on the interactive activity, 'Flower power' (My Rising Stars).

Class activity: What could be more fun than a role playing activity to demonstrate how pollination works? Start by discussing the process of pollination. Then, in a large space, have the children act out the process of pollination. Get some children to act as the stamen and stigma inside flowers and some to be insects. The insects can collect pollen (pingpong balls or beads) from the stamen of one flower and deliver it to the stigma of another. Top tip: Film the role playing activity with a digital camera so your class remember the fun they had taking part.

Try it: Discuss other ways for plants to spread their pollen. For example, some plants pollinate without the help of insects. They just dump pollen into the air and it floats away to other plants.

#### Lesson 4

Teach new knowledge

Seed spreading

TBAT: Explore the part that flowers play in the life cycle of flowering plants, including pollination, seed formation and seed dispersal.

#### Recap

Label parts of a flower on the interactive activity 'Flower Power' (My Rising Stars)

#### Quick Challenge

What do the children think happens to a flower once it has been pollinated? Have they ever seen rosehips? What are they? Where did the rose go?

|                                                                                                                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
|---------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                                                                                           | <p><b>Main activity</b></p> <p>Get into groups: Show the children real examples of seeds from packets. You could also show images taken from the Internet of conkers, acorns, etc. Discuss what seeds are and why plants might make them. (Take care: wash hands after handling packet seeds.) The children can record their observations on the 'Type of seed' sheet (Activity resource book, page 33).</p> <p>Pair up: Discuss what fruit is, looking at some real examples. You could start by cutting a sweet pepper in half. Ask the children to draw what they see inside and label the seeds. Then repeat the process with other fruit such as a tomato and an apple. Discuss why plants make fruit like this for the seeds. And how does it help the seeds spread?</p> <p>Get into groups: Ask the children to harvest some of the seeds from the fruits they are looking at. Dry these out for a few days and then plant them in small pots of compost. See 'It's harvest time!' practical, page 67.</p> <p>Get interactive: Discuss the different ways a seed can be dispersed. For example, how does a sycamore seed or dandelion seed travel to somewhere else? You could liven up the lesson by using the following resource on your interactive whiteboard: <a href="http://www2.bgfl.org/bgfl2/custom/resources/ftp/client/ftp/ks2/science/plants_pt2/dispersal.htm">www2.bgfl.org/bgfl2/custom/resources/ftp/client/ftp/ks2/science/plants_pt2/dispersal.htm</a></p> |
| <p><b>Lesson 5 and 6:</b><br/>Teach new knowledge<br/>Scientific<br/>investigation</p> <p><b>Water transportation</b></p> | <p>TBAT: Investigate the way in which water is transported within plants.</p> <p><b>Recap</b><br/>5 minute quiz with 5 questions from block of learning so far.</p> <p><b>Quick challenge</b></p> <p>Show the children a photograph of a really tall tree. Ask them for their ideas about how we could get water to a person sitting at the top of a tree using different methods. From buckets on a rope to a really long hosepipe, there are lots of ways to choose from. How many can the children think of?</p> <p><b>Main activities:</b> <a href="https://www.bbc.co.uk/teach/class-clips-video/science-ks1-ks2-ivys-plant-workshop-how-does-water-get-from-the-roots-to-the-leaves/zdtfjhw">https://www.bbc.co.uk/teach/class-clips-video/science-ks1-ks2-ivys-plant-workshop-how-does-water-get-from-the-roots-to-the-leaves/zdtfjhw</a></p> <p><b>Scientific question:</b> How does water transport through a plant?</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

|                                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
|-------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                           | <p>"I'm going to put these white carnations into pots of food colouring. What do you think will happen?"</p> <p>Children share thoughts on post it notes.</p> <ul style="list-style-type: none"> <li>- Create prediction: what will happen to the flowers? Which colour do you think will cause the most change?</li> <li>- Method</li> <li>- How are you going to make it a fair test? Keep the flower heights the same, volume of water, amount of food colouring.</li> </ul> <p>Get into groups: Stand white carnations in pots of water with food colouring. Leave them for a few hours, observing every half an hour or so and keeping post it notes observations and see what happens to the colour of the flowers. Take photographs before and after to help the children see just how much the carnations have changed.</p> <p><b>Next lesson:</b></p> <p>Let's recap - what did we look at in our investigation? What do you notice has happened to the flowers? Look at your observations that you have recorded as a class.</p> <ul style="list-style-type: none"> <li>- Write up results</li> </ul> <p>Pair up: Explain that the stem of a plant is full of many long, thin tubes that draw water up from the roots right to the top of the plant. When water disappears from the leaves, the tubes helps them suck up the water.</p> <ul style="list-style-type: none"> <li>- Write conclusion using scientific understanding.</li> </ul> <p>Plenary: Give each group a pile of drinking straws. Show them how to poke one inside another to create a longer straw. Challenge the groups to see if someone standing on a chair could drink water from a cup on the floor. (You could also look at novelty, looped drinking straws or Strawz connectable drinking straws kits.)</p> |
| <p><b>Lesson 7:</b></p> <p>Assessment</p> | <p>TBAT: Explain what I know about plants, the parts of a plant and water transportation</p> <p>Give children 3 post it notes to record 3 new learnt bits of knowledge</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

Children to complete double page spreads showing their knowledge. They can write or draw or a combination of both. Expectation children cover:

- Parts of a plant including flower
- Pollination and seed dispersal
- Water transportation

Example:

# Common Misconceptions

## Year 1:

|                                                                                                                                                                                                                                                                                                                                                                     |                                                                                                                                                                                                                                                                                                                                                                            |

# Year 2:

## Living things and their habitats

- an animal's habitat is like its 'home'
- plants and seeds are not alive as they cannot be seen to move
- fire is living
- Arrows in a food chain mean 'eats'.

## Plants

- plants are not alive as they cannot be seen to move
- seeds are not alive
- all plants start out as seeds
- seeds and bulbs need sunlight to germinate

## Animals including humans

- an animal's habitat is like its 'home'
- all animals that live in the sea are fish
- respiration is breathing
- Breathing is respiration.

## Everyday materials

- only fabrics are materials
- only building materials are materials
- only writing materials are materials
- the word rock describes an object rather than a material
- Solid is another word for hard.

# Year 3:

|                                                                                                                                                                                                                                                                                                                                                                                                                                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |

## Year 4:

|                                                                                                                                                                                                                                                                                                                                                                                                                                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p>Living things and their Habitats</p> <ul style="list-style-type: none"> <li>the death of one of the parts of a food chain or web has no or limited consequences on the rest of the chain</li> <li>there is always plenty of food for wild animals</li> <li>animals are only land-living creatures</li> <li>animals and plants can adapt to their habitats, however they change</li> <li>all changes to habitats are negative</li> </ul> | <p>Animals including humans</p> <ul style="list-style-type: none"> <li>arrows in a food chains mean 'eats'</li> <li>the death of one of the parts of a food chain or web has no, or limited, consequences on the rest of the chain</li> <li>there is always plenty of food for wild animals</li> <li>your stomach is where your belly button is</li> <li>food is digested only in the stomach</li> <li>when you have a meal, your food goes down one tube and your drink down another</li> <li>the food you eat becomes "poo" and the drink becomes "wee"</li> </ul> |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

## States of matter

- 'solid' is another word for hard or opaque
- solids are hard and cannot break or change shape easily and are often in one piece
- substances made of very small particles like sugar or sand cannot be solids
- particles in liquids are further apart than in solids and they take up more space
- when air is pumped into balloons, they become lighter
- water in different forms - steam, water, ice - are all different substances
- all liquids boil at the same temperature as water
- (100 degrees)
- melting, as a change of state, is the same as dissolving
- steam is visible water vapour (only the condensing water droplets can be seen)
- clouds are made of water vapour or steam
- the substance on windows etc. is condensation rather than water
- the changing states of water (illustrated by the water cycle) are irreversible evaporating or
- boiling water makes it vanish

## Sound

- Pitch and volume are frequently confused, as both can be described as high or low.
- sound is only heard by the listener
- sound only travels in one direction from the source
- sound can't travel through solids and liquids
- high sounds are loud and low sounds are quiet

|                                                                                                                                                                                                                                                                                                          |  |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
| <ul style="list-style-type: none"> <li>• <i>evaporation is when the Sun sucks up the water, or when water is absorbed into a surface/material</i></li> </ul>                                                                                                                                             |  |

| <p>Electricity</p> <ul style="list-style-type: none"> <li>• larger-sized batteries make bulbs brighter</li> <li>• a complete circuit uses up electricity</li> <li>• Components in a circuit that are closer to the battery get more electricity.</li> </ul>                                                                                                                                                                                                                                                                                                                                                              |                                                                                                                                                                                                           |

# Knowledge Organisers

*Knowledge organisers should be shared with the children at the beginning of each block of work.*

*In Science, this tends to be at the beginning of each half term. The children should have on average 5-6 knowledge organisers per year.*

*The children should take a copy of this home.*

*The children should have quizzes based on the information on their knowledge organisers on a regular basis and use this as a tool for learning.*

*Knowledge Organisers should show:*

- Diagrams as required*
- Vocabulary*
- Sticky knowledge and Rapid Recall facts*
- How learning may link to previous learning*

# Everyday Materials

Focus: Material Manipulation

Year: 2

Term: Autumn 1

Subject: Science

## Rapid Retrieval (Can I still recall)

- Weather can change
- There are lots of different types of weather: Rain, Sun, Cloud, Wind, Snow etc
- Days are longer and hotter in the Summer
- Days are shorter and colder in the Winter
- There are four seasons: Spring, Summer, Autumn, Winter

## Clever Connections: (Links to the previous learning)

- There are many different materials that have different describable and measureable properties
- Materials that have similar properties are grouped into metals, rocks, fabrics, wood, plastic, and ceramics (including glass)
- The properties of a material determine whether they are suitable for a purpose.

| Key Question                                          | Sticky Knowledge                                                                                                                                                                                                                                                               |
|-------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Elicitation</b>                                    | <ul style="list-style-type: none"> <li>• Recap different types of material               <ul style="list-style-type: none"> <li>-metals</li> <li>-rocks</li> <li>-fabrics</li> <li>-wood</li> <li>-plastic</li> </ul> </li> <li>• Rock is a material, not an object</li> </ul> |

| <b>What makes materials suitable or unsuitable?</b>   | <ul style="list-style-type: none"> <li>• The properties of a material determine whether they are suitable for a purpose</li> <li>• People choose which materials to use after 'best fit' investigations</li> </ul>                                                             |
| <b>How can the shape of solid objects be changed?</b> | <ul style="list-style-type: none"> <li>• Materials can be manipulated/changed for different purposes</li> <li>• a push/pull force can change the shape of a material</li> <li>• some materials cannot be changed by bending or twisting</li> </ul>                             |
| <b>Investigation</b>                                  | SHAPE SHIFTING INVESTIGATION                                                                                                                                                                                                                                                   |
| <b>Results</b>                                        | SHAPE SHIFTING INVESTIGATION RESULTS                                                                                                                                                                                                                                           |
| <b>Assessment</b>                                     | <ul style="list-style-type: none"> <li>• I can recall the above information and retrieve this information in an appropriate manner</li> </ul>                                                                                                                                  |

**Vital Vocabulary:****Opaque**

A material that is not clear enough to see through or allow light through.

**Strength**

The ability that a material has to hold heavy weights without breaking or being damaged

**Transparent**

A material that you can see through or allows light to pass through it.

**Flexible**

Able to bend easily without breaking.

**Rigid**

An object which is stiff and difficult to move or bend.

**Squash**

Push an object into a space that is too small.

**Twist**

To turn something into a shape that is not normal.

**Record**

To keep a written account of your findings.

**Choice**

An act of choosing between two or more possibilities.

# Everyday Materials

Focus: Rocks and Fossils

Year: 3

Term: Autumn 1

### Vital Vocabulary:

#### Ammonite

An extinct creature found as a fossil.

#### Chalk

A soft limestone made from the skeletal remains of sea creatures.

#### Fossil

The remains or traces of creatures that lived long ago.

#### Organic Material

Matter that contains a large amount of carbon-based compounds.

#### Particle

Any of the smallest pieces of matter that make up atoms or the parts of atoms.

#### Peat

A dark brown substance like soil formed by plants dying and being buried.

#### Properties

A quality in a material, especially one that means that it can be used in a particular way

#### Metamorphic

Rock that has undergone transformation by heat or pressure.

#### Igneous

Having solidified from lava or magma.

**Vital Vocabulary:****Intestine**

A long tube through which food travels while it is being digested.

**Mineral**

A chemical that your body needs to stay healthy.

**Nutrients**

Any substance that plants or animals need in order to live and grow.

**Oesophagus**

The tube in the body that takes food from the mouth to the stomach.

**Saliva**

The liquid produced in your mouth to keep the mouth wet and to help to prepare food to be digested.

**Stomach**

An organ in the body where food is digested, or the soft front part of your body just below the chest.

**Dental Hygiene**

Cleaning teeth in order to keep your mouth healthy

**Roughage**

A substance in certain foods, such as fruit, that travels through the body as waste

**Digest**

Break down food into substances that can be absorbed and used by the body.

# States of Matter

**Vital Vocabulary:**

**Dissolve**

A solid, which is absorbed by a liquid, especially when mixed.

**Mixture**

A substance made from a combination of different substances, or any combination of different things.

**Particle**

An extremely small piece of matter.

**Reversible**

If something is reversible, it can be changed back to what it was before.

**Saturate**

To fill a thing completely so that no more can be added.

**Separate**

To cause two or more things to stop being with or near each other.

**Soluble**

Able to dissolve in another substance, usually a solid dissolves in a liquid.

**Solution**

A liquid in which other substances have been mixed and dissolved.

**Evaporate**

Turn from liquid into vapour.

## Vital Vocabulary:

### Aorta

The main artery carrying blood from the heart to other parts of the body.

### Arteries

The thick tubes that carry blood from the heart to other parts of the body.

### Blood vessels

The tubes through which the blood flows.

### Chambers

A space in the heart which is separated from the rest.

### Circulatory system

The system that moves blood through the body. It includes heart, arteries and veins.

### Deoxygenated blood

When oxygen has been removed from the blood – it is carrying more carbon dioxide.

**Deoxygenated blood:**  
**Deep red-purple**

### Oxygenated blood

Blood that contains more oxygen – straight from the lungs.

**Oxygenated blood:** **Bright red**

### Veins

The tubes that carry blood from all parts of the body back towards the heart.

### Heart rate

the speed at which the heart beats.

# Characteristics of Effective Science Teaching

## What would I see in a unit of Science? What would I see in a Lesson?

|                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                       |                                                                                                                                                           |
